

Implement a queue using a list in Python. Include the necessary methods such as enqueue, dequeue, and isEmpty.

Soln:

```
class Queue:
    def __init__(self):
        self.queue = []

    def enqueue(self, item):
        self.queue.append(item)

    def dequeue(self):
        if not self.isEmpty():
            return self.queue.pop(0)
        else:
            raise IndexError("Queue is empty")

    def isEmpty(self):
        return len(self.queue) == 0
```
